

AEOL (Australian Engineering OnLine) “Quality Guidelines”

AEOL’s quality guidelines aims to maintain the intent of our services – putting our user’s interests first and providing value solutions for our customers.

As such, we reserve the right to refuse the adding of ‘AEOL Releases’ or ‘Recommended Links’ we believe do not keep with the intent of our services.

As a guide, we will refuse to add content that:

- Is discriminative to an individual or organisation
- Offers little value, little interest or is misleading to the user
- Looks to manipulate the open nature of the AEOL platform
- Does not comply with AEOL Terms & Conditions
